To create a desktop shortcut to any Windows 10 settings page:
Right-click an empty section of the desktop and select `New > Shortcut`
In the empty text field, copy and paste the `URI` from the list above.

Versions: unless indicated otherwise Windows 10 Creators Update or greater. The Microsoft link below has a few newer settings.

"The greater danger for most of us lies not in setting our aim too high and falling short; but in setting our aim too low, and achieving our mark" ~ Michelangelo
